

SABER SAW

Highly-equipped saber saw with orbital action, vibration damping and safety coupling.

SBS 1300-VES
Art. No. 0702 695 1

Orbital action.

As with a jigsaw, the saw can also be made to orbit for fast cuts.

Safety coupling.

If the saw blade gets hung up, the safety coupling prevents the machine from being damaged and the user from being injured.

Saw blade quick-change mounting.

For toolless, fast saw blade changes.

Stroke rod with special seals.

Protects gearbox against dust, increasing service life of saw.

Precise mounting of stroke rod.

The saw blade suffers minimum play, which allows for precise cutting.

Warranty

2 Years Warranty on manufacturing and material defects. Excluded are damages caused by improper use, overloading or failure to observe the operating instructions. The current WÜRTH MASTER warranty conditions must be observed.

Available in the fleet management system ORSY®fleet.

Delivery scope		
Designation	Art. No.	P. Qty.
Saber Saw SBS 1300-VES	0702 695 X	1
Saw Blade	0615 915 026	5
Empty Plastic Carrying Case	0955 702 695	1

Technical Data	
Voltage	220-230 V/ 50-60/ Hz
Protection class	□
Power consumption	1,300 W
Output	600 W
No. of strokes at no load	0-3,000 rpm
Stroke	32 mm
Cable length	4 m
Weight	4.2 kg

1 Saw blade quick changing system:

The saw blade can be clamped without any additional tools.

2 Orbital action:

As with jigsaws, the saw blade can be made to orbit if necessary. This enables the saw to cut much faster.

3 Speed adjustment wheel:

The maximum number of strokes can be adjusted to the respective application.

4 Vibration damping:

A counter-vibration element reduces vibration that arises directly in the machine. This allows for a smoother and more precise cut.

5 Safety coupling:

If the saw blade gets hung up, the safety coupling prevents the machine from being damaged and the user from being injured.

6 Stop adjustable without tools:

By adjusting the stop, the entire length of the saw blade is utilized.
