

Cross-line laser CLG 18

Self-levelling cross-line laser for indoor and outdoor use with highly visible green laser lines

Precision in green

- Green laser lines ensure extremely good visibility and can also be easily seen in bright light conditions
- Especially long, fine yet sharp lines due to the large exit apertures of the laser
- Automatic monitoring eliminates levelling errors. If the self-levelling range is exceeded, the laser lines start flashing

Simple operation

- Self-levelling in seconds for rapid alignment
- Can also be used over long distances by locating the laser beams using the LRU 18 universal receiver [inline reference], available separately
- Easy to use with one button for quickly switching all lines on and off
- The laser can be attached to ceiling profiles and 1/4 and 5/8 inch tripods using the optional CLL-A universal bracket
- The strong magnetic system of the CLL-A adapter (included in the scope of delivery) can be easily attached to any magnetic surface
- Long battery life for uninterrupted work
- Robust housing is protected against dust and splash water for use in harsh environments

Various power sources

- Continuous operation thanks to the powerful Li-ion battery pack, which can even be charged while working
- The device can also be operated with alkaline batteries using the battery holder included in the scope of delivery

Laser category	2
Levelling measuring accuracy (+/- per length)	2 mm/10m
Self-levelling range (+/-)	4 Degree
Range without receiver	35 m
Range with receiver	80 m
Min. temperature conditions	-10 °C
Max. temperature conditions	50 °C
Length	110 mm
Width	65 mm
Height	100 mm
IP protection class	IP 54
Type of rechargeable battery/battery	Li-Ion

Rechargeable battery/ battery life	Up to 28 hours
