

## MULTI Cobra

### Rust penetrating agent

- Excellent creeping properties ensure quick rust and corrosion penetration.

### Lubricant

- Very good lubrication properties. Remedies creaks and squeaks. Reduces friction and wear.

### Cleaner

- Great cleaning power is ensured thanks to penetration under dirt, grease and oil residue.

### Corrosion protection

- Best possible cling to metals. A thin, viscous protective film prevents moisture on even the smallest uneven spots and protects against rust and corrosion.

### Contact spray

- Water and moisture-displacing properties and excellent creeping properties improve electrical conductivity and remedy leakage current.

**Resin, acid- and silicone-free and does not attack rubber, paint or plastics.**

### Use:

- Loosens rusted bolts, pipe fittings, screws, nuts, joints, Bowden cables, shafts, locks etc..
- Lubricates closures, hinges, bushings, chains, door locks.
- Stops squeaking and creaking and frees up movement of stuck or jammed parts
- Cleans and cares for plastic and metal parts such as coverings and housings.
- Prevents corrosion of metals and electrical modules, cable connections, relays, plugs, couplings etc..
- Prevents icing of cylinder locks and closures.
- Penetrates and displaces moisture in electrical and electronic applications.

### Technical data:

Colour	transparent bright yellow
Density	0.790 g/ml
Temperature range	- 30 °C to +130 °
Base oil viscosity	C 30 cst at 40 °C

This information is only a recommendation based on our experience.

Preliminary testing required.
