

## Circular saw blade for cordless wood circular saws

**For mobile use and precise cuts in material, especially for cordless hand-held circular wood saws.**

- Perfect cutting results in any material due to optimised tooth geometry and colour code
- Extra thin, super fast and simple cuts thanks to the thin steel blade

Diameter x saw cutting width/main blade thickness x drill hole	Number of teeth	Tooth shape	Material to be processed	Art. no.	P. Qty.
190 x 1.8/1.2 x 30 mm	24 PCS	Alternating tooth	Softwood, Hardwood	<b>0610 281 924</b>	1
190 x 1.8/1.2 x 30 mm	30 PCS	Alternating tooth	Cement asbestos, Fibre-board, Wood, Gypsum plasterboard, PVC	<b>0610 271 930</b>	1
190 x 1.8/1.2 x 30 mm	42 PCS	Alternating tooth	Softwood, Hardwood	<b>0610 271 942</b>	1
190 x 2/1.35 x 30 mm	54 PCS	Trapezium tooth/flat tooth	Aluminium profile	<b>0610 241 954</b>	1

### Details/Application

For cutting hardwood and softwood, coated and uncoated panel material, aluminium (profiles), Trespa®/HPL, gypsum plasterboard, fibre cement

### Instructions

- Always switch on the machine in front of the material
- Clamp the material (avoid vibrations)

### Notice

Vibrations significantly reduce the service life of the circular saw blade
