

Pre-charged NiMH high-capacity rechargeable battery Pre-charged

35 % longer performance than conventional NiMH rechargeable batteries

Ideally suited for applications with high energy requirements

Can be used immediately as the rechargeable battery is already charged

Durable

- The rechargeable batteries need to be replaced less often due to their lower self-discharge and higher capacity compared to conventional batteries
- The batteries lose minimal charge even if they are not charged for a long time

Environmentally friendly

- The composition of this type of rechargeable battery makes it less harmful to the environment

No memory effect and can be charged quickly

- In addition, the rechargeable batteries can be charged quickly without reducing their service life

Nominal voltage	1.2 V
Type of rechargeable battery/battery	NiMH
Suitable chargers	Pro 5, Pro 6

	Battery designation	Rechargeable battery/ battery capacity	Product weight (per item)	Art. no.	P. Qty.
	Mignon AA	2850 mAh	32.5 g	0827 360	4
	Micro AAA	1100 mAh	15.25 g	0827 350	4

Details/Application

Suitable for digital cameras, wall clocks, measuring instruments, medical devices, household products etc.
