

Silicone Mask Sterilisable

Protective mask made of silicone, self sterilising by microwave with disposable TNT filter

Certifications

- 2001/95/CE
- IEC 61882:2016
- IEC 61511-1:2016 Functional safety
- FDA EU 2002/72/CE
- RoHs, REACH

Reusable mask made of self-sterilizing by microwave medical silicone with a disposable TNT filter sterilizable by usual methods (boiling water / other).

The medical silicone provides a more effective and secure seal, complies with all applicable standards and specifications and contains silver ions that make the surfaces permanently antibacterial.

This innovative solution solves the problem of the continuous supply of disposable masks through a reusable mask, easily sterilizable, with disposable filters. The masks can be easily fixed through a secure mechanical coupling.

The Mask Kit comes complete with a set of 30 filters.

Art. No.	Description	Qty
899 110 850	Silicone protective Mask	1
899 110 859	Pack of 30 Spare Filters	1
