

VAKU LIGHT

Multi-metal polyester putty extremely easy to sand

- Light loads. Great ease of sanding without clogging the disc.
- Good surface finish.
- It allows you to start sanding with a less coarse abrasive.
- Easy and fast application. Perfect viscosity and mixed.
- It allows to apply a lot of quantity at one time with comfort.

Applications

As filler in sheet metal and paint shops, bodywork, industrial vehicles, marine, motorcycles, etc.

Contents	Art. No.	Qty
1.300ml + 50g Hardener	0993 140	1/8

Technical data	
Chemical Base	Unsaturated polyester resin, light weight inert, pigments
Colour	White
Weight	1.2 kg/L at 20 °C
Mix life with 2-3% Hardener at 20°C	5 minutes
Heat resistance	80 °C at 100 °C
Drying time	25 minutes at 20 °C in galvanised sheets wait 1 hour to 2 hours before sanding
Application temperature	More than 5 °C
Dry sanding	P80 to P280
Repainting	All bases used in automotive
Types of veneers	Steel sheets, galvanized, electrozinc, aluminum, wood and parts with polyester base
Storage conditions	At 20 °C in airtight container
